**stage measurements - inside width - inside depth - clearance - overall width - overall depth - height**

	A	B	C	D	E	F
<b>OPTION 1</b>						
12 x 10 m	12,3 m	10,6 m	7,2 m	14,6 m	12,9 m	9,5 m
39.4' x 32.8'	40.4'	34.8'	23.6'	47.9'	42.3'	31.2'
<b>OPTION 2</b>						
9 x 7 m	9 m	7 m	6.5 m	10.9 m	9.4 m	7.1 m
29.7' x 23.1'	29.5'	23'	21.45'	36.1'	31.1'	23.5'
<b>OPTION 3</b>						
7 x 5 m	7.3m	5 m	4 m	7.9 m	5.6 m	5.6 m
24' x 16'	24'	16.5'	13.2'	26'	18.5'	18.5'

Our basic 4 tower roofing structure is capable of having up to 3 tonnes of production weight flown, but with adding our extra 4 towers we have the ability of extending this to 7 tonnes which is ideal for hanging lighting, video, sound systems and even LED screens. These stages are perfect as the main stage for larger scale concerts and festivals and can have PA / Video screens attached to side wings to save space on the stage. Our stages are a modular aluminium truss system. The stage deck can be built at any height you wish, with stages over 3ft we add additional handrails on the back and sides. We can also add backstage ramps, treads, dressing rooms and covered storage areas. Our products are recognised globally as trademarks for quality and reliability.

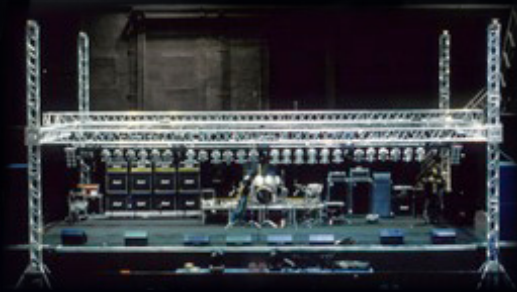

**AVC has partnered with a professional rigging company whose personnel have Plasa NRC Level 2 & 3 qualifications for rigging.**

Our stages are designed for speed and ease of use, strength and versatility in any environment.

All our products are manufactured according to the highest quality process control by certified welders to DIN4113, SLV and RWTUV approvals ensuring our systems are of the highest possible standards ensuring the safe use of products at all times.

All roofs are Milos MR2. Made from MT1 Towers & M290V and M390L Trusses.

The whole system is easily transported and nearly all of the components can be re-purposed for other applications giving us great flexibility.

For our clients, the most efficient and stress free way to produce an event is to use our turnkey facilities and solutions.
