

## AUDIO VISUAL SERVICES

From equipment rentals to complete presentation services, AVC is a leading audio-visual equipment rental choice for presentations & meetings, conferences, AGM's, award dinners, tradeshow and special events.

Our audio visual services are designed to take away the headache of setting up, operating and managing audio visual equipment.

For more than 20 years, customers have trusted our professionalism and equipment to deliver flawless presentations – and we deliver every time. From single-day meetings with simple audio visual requirements, to full-scale international conferences or multi-day festivals, our expert team helps you deliver powerful, professional messages.

You need to make a professional presentation, but your core business isn't in audio visual equipment. Why not let the professionals help. When you need equipment and expertise, but don't have the proper resources, turn to AVC, we offer a total service solution so why not order everything you need from a single source.

AVC's expertise is unrivaled. With AVC, you get hassle-free solutions and the peace of mind that comes from having a partner who anticipates your every need.

## LIGHTING

Lighting can add excitement to your event and help create the right mood. AVC's experienced technicians will work with you to design the right mix of lighting fixtures, dimmers and controls to achieve your lighting look; helping you stay on-time and on-budget. Programmable LED lights are the latest addition to AVC's extensive lighting inventory, which also includes intelligent lights, follow spots and special effects.

## SET DESIGN

From custom screen surrounds to pipe & drapes, AVC offers a broad array of resources together with the ease and convenience of working with a single source. Using computer design tools, our team will help visualise your concept and bring it to life. AVC's design, production and staging professionals will provide you with a custom turnkey solution from design to completion.

## EXHIBITION STANDS

Do you need to hire exhibition panels or display boards for your trade show, wedding fair, jobs fair or any other type of event or exhibition? If so we have a large rental stock of exhibition panels in a choice of colours and can provide a wide variety of display systems from single panels to large booths.

## VIDEO PRODUCTION

Whether for videoconferencing, image magnification or recording your event, AVC offers a full range of professional video production services. AVC's experienced production team, including professional camera operators, directors and editors, will help you achieve the desired result. Post production sound tracks and visual effects can be added to your video to create a polished final product.

## COMPUTERS

Make sure you have all of the technology you need to ensure a smooth event. AVC carries a complete assortment of cutting-edge computer equipment, all immediately available for rental.

Here you'll find just some of the essential technologies our customers are using.

- Laptop & desktop computers
- Printers, fax machines & copiers
- Routers, hubs & distribution cable

## VIDEO CONFERENCING AND LIVE STREAMING

Videoconferencing uses transmission of audio and video to bring people at different sites together for a meeting. This can be as simple as a conversation between two individuals in private offices (point-to-point) or involve several sites (multi-point) with large audiences. Using our Live Web Streaming service, your event can be broadcast globally over the internet.

## PANORAMIC SCREENS - SOFT EDGE BLENDING

Using high end hardware/software we can now project onto screens of any size. We are no longer constrained to using standard 16:9 or 4:3 size screens. Our panoramic screens are as tall as 20 ft, and up to 80ft wide. Soft edge blending is the method used to create a larger video display by combining the image of two or more projectors. The process of edge blending, involves manipulation of individual pixels to ensure perfect intensity over a specified blend zone.

## SIMULTANEOUS INTERPRETATION

If you are planning a meeting with participants from different countries speaking several languages, AVC can help by providing simultaneous interpretation equipment & services. AVC will deploy specialised equipment such as microphones, headsets, transmitters and interpreter booths, including the expertise necessary to install and operate the equipment. We work closely with clients to manage interpretation equipment logistics, including proper placement, security and technical monitoring during the conference. AVC clients enjoy the benefits of an expert, friendly and hassle free experience.

AVC is one of the largest suppliers of audio visual equipment rental and production services throughout Ireland. Our friendly and knowledgeable AV technicians are highly trained and more than willing to help. We provide testing and rehearsals of all of your rental equipment so that you can present with confidence!

**We have the experience and know-how to make your event a success.**

## AUDIENCE RESPONSE SYSTEMS

Engage participants, assess learning, gather data and enhance your next presentation with an audience response system. AVC's audience response systems integrate seamlessly with Microsoft PowerPoint presentations and allow audiences to participate by submitting responses to interactive questions with hand-held keypads. Using audience response systems, your presentations become powerful assessment tools, collecting real-time audience responses and dramatically improving productivity.

## AUTO CUE SYSTEMS

This system is designed for corporate conferences or other events where a speaker is addressing an audience. From the audience's perspective, the high quality prompter glass is transparent, giving the impression that the presenter is speaking fluently and professionally without any assistance. From the presenter perspective, the glass displays a mirror image of the pre-prepared speech from the LCD monitor at the base of the stand.

Our quality prompter operators are personable and experienced; they make a positive contribution to your project. Our equipment is the best: reliable and high-performing.

Our creative planning and operations team can work with you to craft any AV setup imaginable. No matter the size or complexity of your event, we can help you orchestrate an audiovisual solution that's custom-tailored to your needs. From nationwide video installations to global telecommunications conferencing, we are fully equipped to handle even your most out-of-the-box request.

The largest equipment inventory in Ireland and a proven track record of results culminates in a memorable and flawless execution of your event. Contact us today and discover how our professional team can make the difference.
